

1

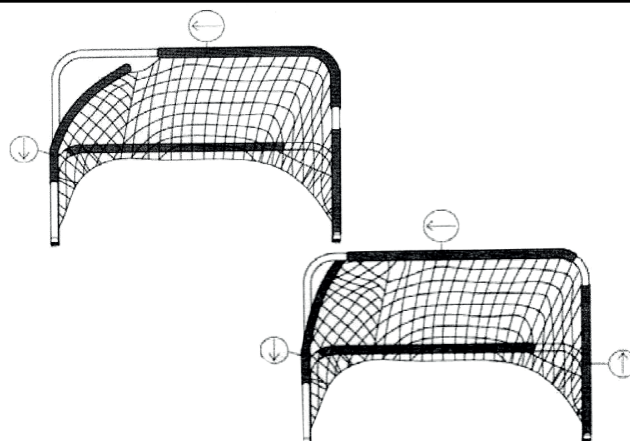

When you open the packing, you will see the compound goal, see below. Remove the fixing tapes and tube protection.

2

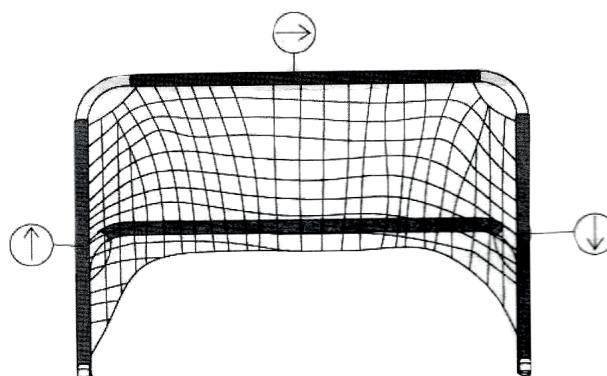

Take out the goal. Move the net sleeve from the left side to the right, insert the top left side of the goal to the lower frame and fasten by the fixing of the hinge.

Then move the net sleeve to the other side, attach remaining right part to the lower frame and fasten in the same way.

3

The net sleeve place equally all over the circumference of the goal and hold out the lower frame perpendicularly to the upper frame. Put the goal.

4

Fix the goal using the enclosed pins. For the fixing outside you can use the enclosed pegs. The goal is now ready to use.
